Bangalore, India

## Professional Summary

Operational leader with 10+ years of experience leveraging **Agentic AI (Vibe Coding)** to build high-performance healthcare systems. Pairing deep clinical domain expertise with rapid AI orchestration to bridge the gap between **Ground Reality** and **Modern AI Compliance**. Architect of Omnilngest: A platform built via agentic workflows that turns complex regulatory laws into production-grade, compliant software at 10x speed.

## Experience

### Senior Agentic Solutions Architect (Healthcare) | Omnilngest Systems Nov 2025 – Present

**Agentic Orchestrator:** Utilizing "Vibe Coding" workflows to build robust, compliant healthcare microservices. Orchestrating AI agents to translate 10+ years of clinical wisdom into production code.

**Cryptographic Compliance:** Engineered a "Kill Switch" for DPDP Act 2023 (Rule 8.3) using cryptographic shredding to ensure irreversible data deletion.

**FHIR R5 Remediation:** Built a Rust-accelerated ingestion layer to normalize legacy hospital data into FHIR standards.

**Tech Stack:** Agentic AI (Cursor/Composer), Python 3.10+, Rust, HL7 FHIR, AES-256 Cryptography.

### Data Analyst (Strategic Rural Exposure) | R K Nursing Home Oct 2020 – Oct 2025

**Strategic Rural Focus:** Intentionally returned to a rural setting to study the "ground truth" of unstructured medical data, identifying the gap between urban tech policies and rural capabilities.

**The Omnilngest Genesis:** Standardized years of legacy patient records, proving that "Ingestion Failures" in rural hospitals are the primary blocker for national interoperability (ABDM).

### Operations Manager (The Health-Tech Catalyst) | K Arogya Advisory Services Dec 2018 – Aug 2020

**Multi-Center Implementation:** Led a strategic mission to deploy data-driven clinical workflows across major institutions: KG Hospital & Rao Hospital (Coimbatore), Ramaiah (Bangalore), Velammal (Madurai), and SRM (Chennai).

**Data Standardization:** Successfully trained teams on patient data capture, exposing critical variances in data standards across hospitals—a key inspiration for future interoperability work.

### Operations Manager | R K Nursing Home Nov 2016 – Nov 2018

**Resource Optimization:** Chose to lead operations in a high-volume, resource-constrained environment to master the efficiency protocols required for scalable hospital management.

**Patient Flow Logic:** Streamlined clinic-to-patient data flows, creating the manual prototypes for the digital workflows I design today.

### Customer Care Executive | Cloudnine Group of Hospitals Nov 2015 – Nov 2016

**Patient Relations:** Managed critical healthcare communication at Bangalore's premier maternity hospital, gaining deep insights into "patient-side" friction points in healthcare metadata.

## **Healthcare Operations Coordinator | R K Nursing Home May 2012 – Nov 2015**

**Operational Blueprint:** Established the core logistics and clinical coordination protocols for the facility—creating the very manual systems I would eventually return to digitize.

### **Technical Skills**

---

Agentic AI (Cursor/Composer), Vibe Coding, Python 3.10+, Rust, SQL, Polars, GenAI

### **Healthcare & Compliance**

DPDP Act 2023, HL7 FHIR R5, ABDM 2.0, HIPAA, Medical Law

### **Orchestration**

AI Governance, Data Privacy, AES-256 Cryptography, Ops Strategy

### **Engineering Portfolio**

---

**Omnilingual Identity (GitHub):** Full-stack repository demonstrating the "Safety Rails" architecture, including the agent-orchestrated remediation engine and Python compliant layers.

**The "5-Year Code" Initiative:** A personal discipline protocol involving daily code commits and architectural review, demonstrating sustained technical growth and consistency in building health-tech solutions.

### **Education & Certifications**

---

#### **Bachelor of Computer Application (BCA) | University of Mysore 2023 – 2026 (Pursuing)**

Foundational degree focusing on core Computer Applications, Database Management, and Systems Analysis—essential skills for a techno-legal specialist building compliance tools.

### **Professional Certifications**

**Data Science & AI Certification** - Learnbay & IBM (Credential ID: 973125b) | *Module Completed: Python | Pursuing: IBM Capstone (GenAI & DS)*

**HIPAA Training Certification** - HIPAA TRAINING.US (ID: HIPAA-0022256) | *Ensures Python-based PII masking logic adheres to technical safeguards.*

**DPDP Act v1.1 Certification** - Adv. Prashant Mali (AI Governance, Legal Law)

### **Continuous Learning (In Progress)**

**Generative AI Developer** - IIT Guwahati (GenAI, ML, AI Ethics)

**Medical Law Certification** - IIT Kharagpur (Bioethics & Reg. Compliance)

**Healthcare Data Quality & Governance** - Coursera (UC Davis)
