PROFESSIONAL SUMMARY

Senior Clinical SME & Health-Tech Architect with 13+ years of healthcare operations and data governance expertise. Specialized in bridging clinical "ground-truth" reality with high-level software engineering, focusing on ABDM 2.0 interoperability, FHIR R5 standards, and strict DPDP Act compliance. Proven track record of managing 200+ daily patient encounters and maintaining 99.9% data integrity across high-volume clinical environments.

PROFESSIONAL EXPERIENCE

Strategic Technical R&D Sabbatical (SME & Architect) | Self-Directed | Oct 2025 – Present

- Architecting the OmniIngest-Clinical-Engine to bridge 13 years of domain expertise with modern data engineering for automated clinical data standardization.
- Designing 'ClinoSyn': Leveraging GenAI, LLMs, and LangGraph for intelligent clinical synonym mapping to ensure automated alignment with FHIR R5 standards.
- Engineered the '7-Pillar Vault' and 'The Incinerator' module, integrating AWS/Azure cloud security logic to guarantee DPDP Act Rule 8.3 compliant data privacy management.
- Formalizing technical depth through BCA (Final Year) to bridge clinical domain expertise with computer applications.

Data Analyst / Clinical Domain Lead | R K Nursing Home | Oct 2020 – Oct 2025

- Architected end-to-end clinical data pipelines, ensuring 99.9% data integrity for state and central government regulatory reporting.
- Managed and optimized workflows for 200+ daily patient encounters across multidisciplinary hospital environments.
- Developed the OmniIngest Prototype: A Python-driven engine to convert unstructured clinical records into structured vaults, targeting an 85% reduction in manual processing time.
- Led the digital transition of legacy paper records into structured formats, reducing data retrieval lag by 30%.

Operations Manager (Health-Tech Catalyst) | K Arogya Advisory Services | Dec 2018 – Aug 2020

- Directed multi-center leadership operations, implementing clinical workflows and data-collection protocols across partner institutions including Ramaiah, SRM, and KG Hospital.

Operations Manager | R K Nursing Home | Nov 2016 – Nov 2018

- Managed strategic leadership initiatives for clinical logistics, reducing operational bottlenecks by 30% through standardized data capture.

TECH STACK

- **CLOUD & INFRA:** AWS (S3, Lambda), Azure Health Data Services, Docker.
- **AI & GENAI:** LLMs (GPT/Claude), LangGraph, Prompt Engineering, Vector Databases.
- **CORE TECH:** Python (Pandas/Polars), SQL (PostgreSQL), Cursor/Composer.
- **HEALTH-TECH:** HL7 FHIR R5, ABDM 2.0 Interoperability, HIPAA/DPDP Compliance.

EDUCATION

- **BCA (Final Year):** University of Mysore | Formalizing 13Y systems expertise
- **Executive Program in GenAI:** IIT Guwahati | Specializing in LLM Orchestration
- **Medical Law:** IIT Kharagpur | Learning Sabbatical | Focus: DPDP & ABDM
- **Python for Data Science:** Completed (Learnbay)
